B.Sc in CSE
Daffodil International University
Dhaka-1230, BD
May 2021 – April 2026
Current CGPA: 3.10 / 4.00

HSC in Science
Mount Everest College, Dinajpur-5200
GPA: 4.17 / 5.00 | 2020

PROFILE

Full-Stack Web and App Developer with hands-on experience in React, Next.js, Node.js, and MySQL. Passionate about building scalable and user-friendly applications with clean architecture and efficient API integration, focusing on performance, security, and maintainability.

WORK EXPERIENCE

HAMS Fly Limited *June 2024 – September 2024*
API Integration Developer (Contract – Remote)

- Developed and integrated dynamic web interfaces using Next.js and React, ensuring seamless user experience and optimized performance.
- Implemented API integration and data synchronization between frontend and backend services, improving system efficiency and reducing response time.

LIVE CLIENT PROJECTS *~~Built and Deployed*

Rajuria High School *~School Management System* *Aug 2025 – Ongoing*
Tech Stack: React (Next.js) · Tailwind CSS · Node.js · MySQL

- Developed user and admin panels for managing school info, admissions, events, and contact details.
- Implemented a simple CMS for adding, editing, and deleting dynamic content.
- Built a responsive, fast, and database-driven site ensuring smooth user experience and secure admin access.

Rose Bakery *~Billing, Customers, Employees Management* *Sep 2025 – Oct 2025*
Tech Stack: React (Vite) · Tailwind CSS · PHP · MySQL

- Built a full-featured billing and stock management system with real-time product and invoice handling.
- Implemented customer, product, and sales summary modules with automated stock updates.
- Designed a modern UI and RESTful API-based backend using a controller architecture for clean, maintainable code.

Mitali Residence *~Tenant Tracking & Billing Management* *Jan 2025 – Mar 2025*
Tech Stack: Java, PHP, MySQL || For Android Devices

- Developed a fully functional mobile application for managing rental houses and rooms.
- Implemented admin and user modules for handling tenants, rent tracking, and billing.
- Integrated room listing, rent history, tenant information, and automated bill generation features.

PERSONAL PROJECT

E-Cash (Web-Based Wallet System)
Tech Stack: React (Next.js) · Tailwind CSS · Node.js · MySQL
- User Role: Perform Send Money and Cash Out transactions securely.
- Agent Role: Manage Cash In and Cash Out for assigned users.
- Company Role: Track all transactions and monitor agent activities.
